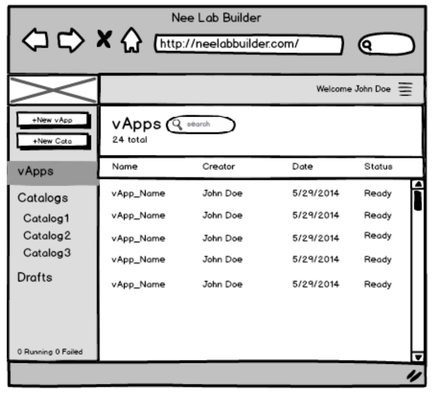
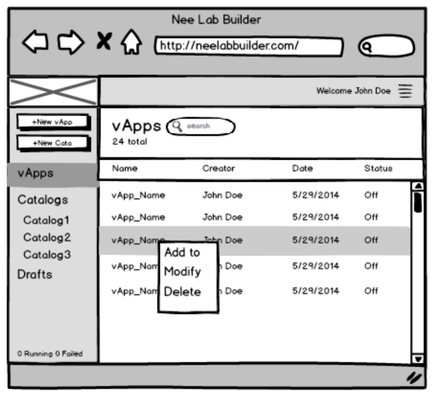
vApps Tab

All vApps will be stored in the vApps tab

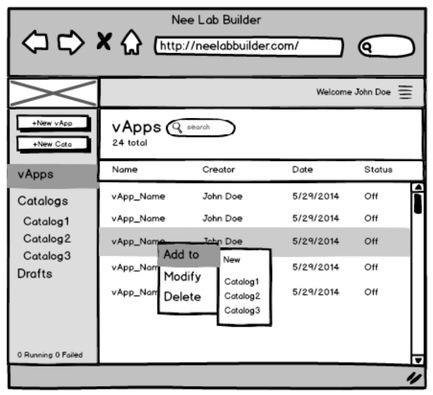


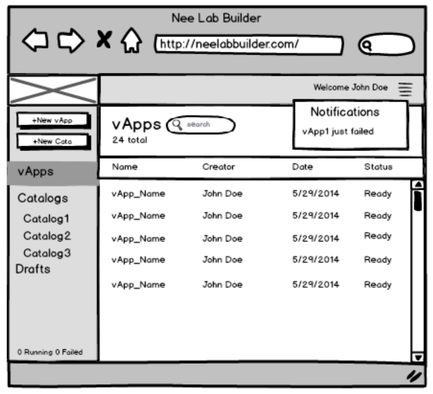
Right clicking will allow the user to add a vApp to a catalog, modify it, or delete it.

Double clicking will bring the user to the vApp view.



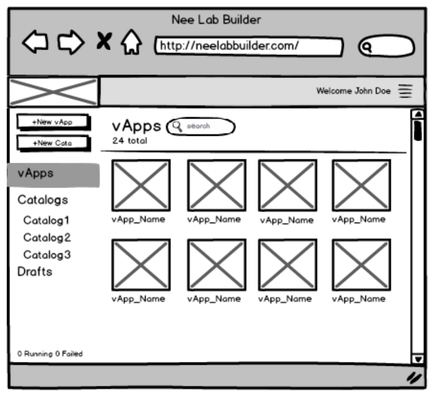
The user can also drag and drop 1 or several vApps into a catalog



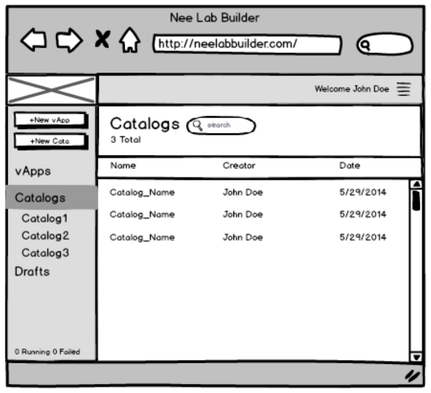


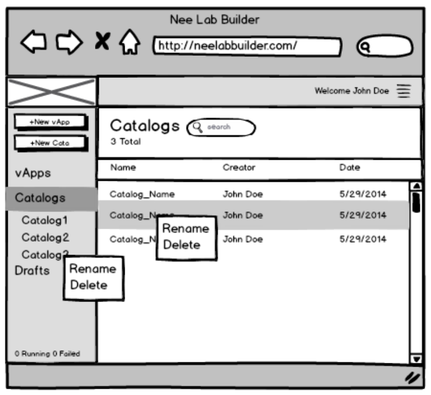
Alternate

Instead of a list view, the vApps can be displayed graphically



Catalog Tab

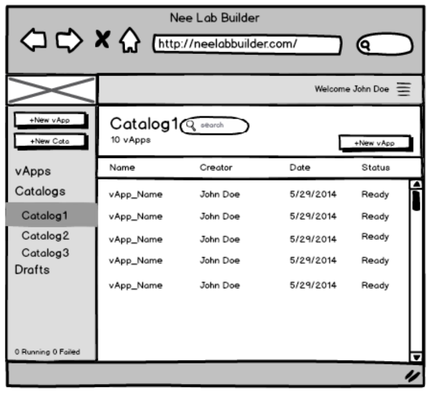




Right clicking will allow the user to rename or delete a catalog

Double clicking will bring the user to the catalog view.

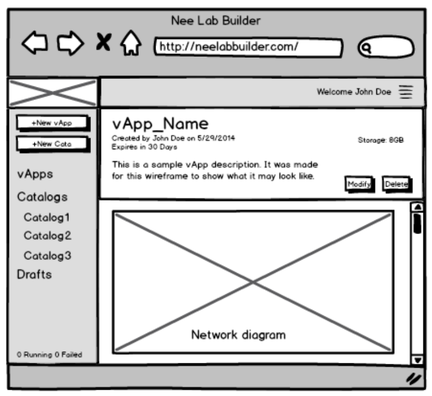
Catalog View



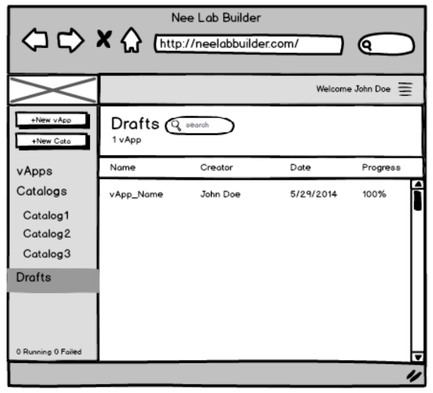
vApps created in a catalog will automatically be added to it. They will also be in the vApps tab.

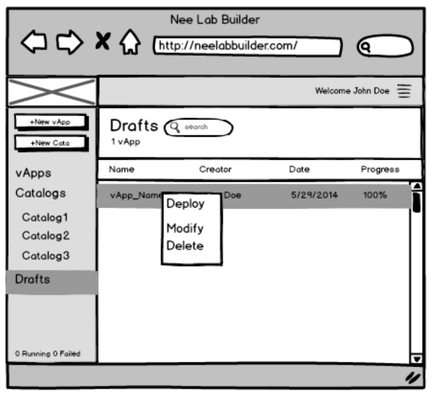
Functions like the vApp Tab

vApp View



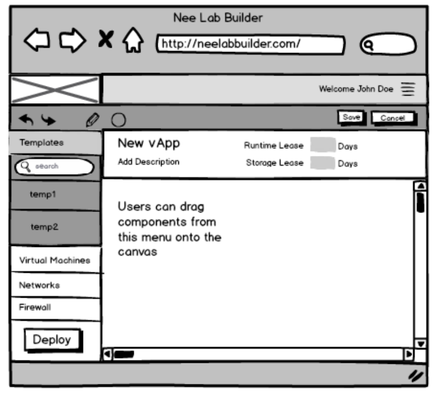
Drafts View





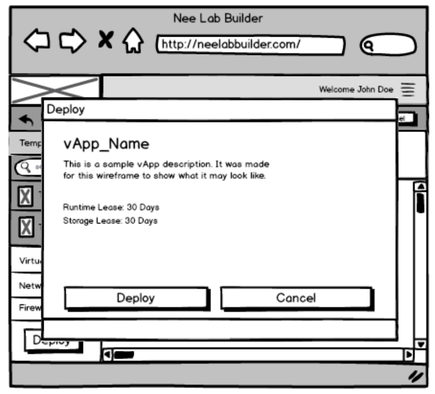
Double clicking will bring the user to the builder

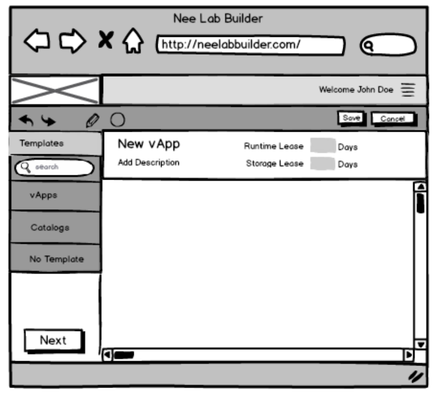
New vApp

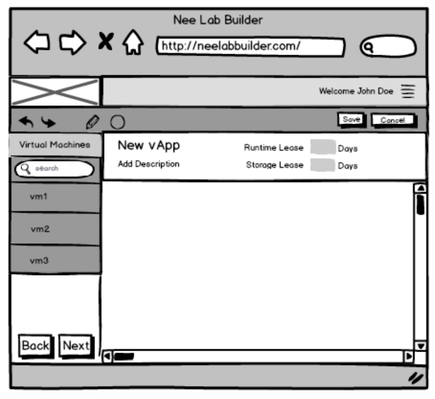


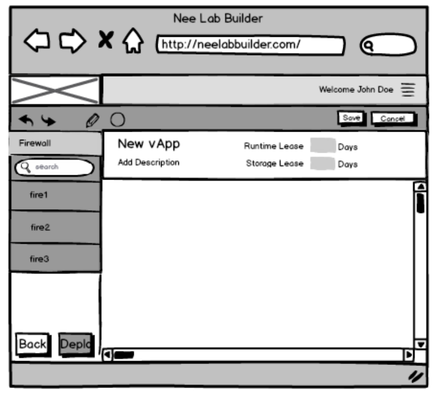
Toolbar includes connector tool, eraser, and flip tools

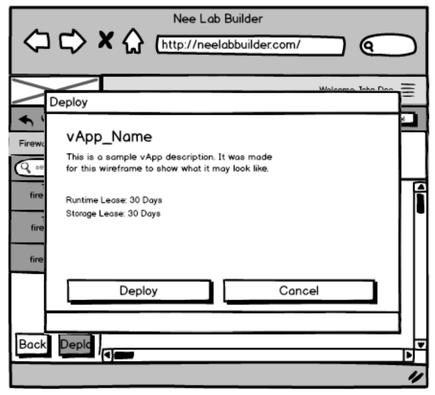
Users can save their vApp as a draft.



Alternate








A more guided version. The user goes through the steps so that they touch each section and don't forget anything.
